

HUNTER ***Engineering Company***

West Carolina is proud to announce the addition of our new state of the art Hunter Engineering alignment system. This new computerized system uses electronic sensors that mount directly to the wheels to align all the axles in parallel to the frame centerline. In addition to aligning, our techs 1st begin with checking driveline angles, air ride height, king pin wear, bearing adjustment and tire air pressure. A full axle alignment not only increases tire life but improves fuel mileage by reducing the truck's rolling resistance.

Front axle alignment	\$97.95
 With appointment	\$92.95
Three axle alignment	\$194.95
 With appointment	\$179.95
Trailer alignment	\$194.95
